Buildings (Ready) (1)

Task name
Apply settings and flight control for building model unit

Programs (1)

Task name
Type evidence without program state

Modules (1)

Task name
Produce delivery evidence during module follow-up

State (1)

Task name
Accept repository evidence pulled with artifact evidence

Delete task #task-app

Permanently removes this task and its stored evidence. Fork alternatives and the repository stay in place.

DELETED

- Task record and workflow state
- Runs, events, and provider sessions
- Stored Git, test, and GitHub evidence

KEPT

- Repository and Git history
- Remote branch, PR, and commits
- Fork alternatives and source tasks

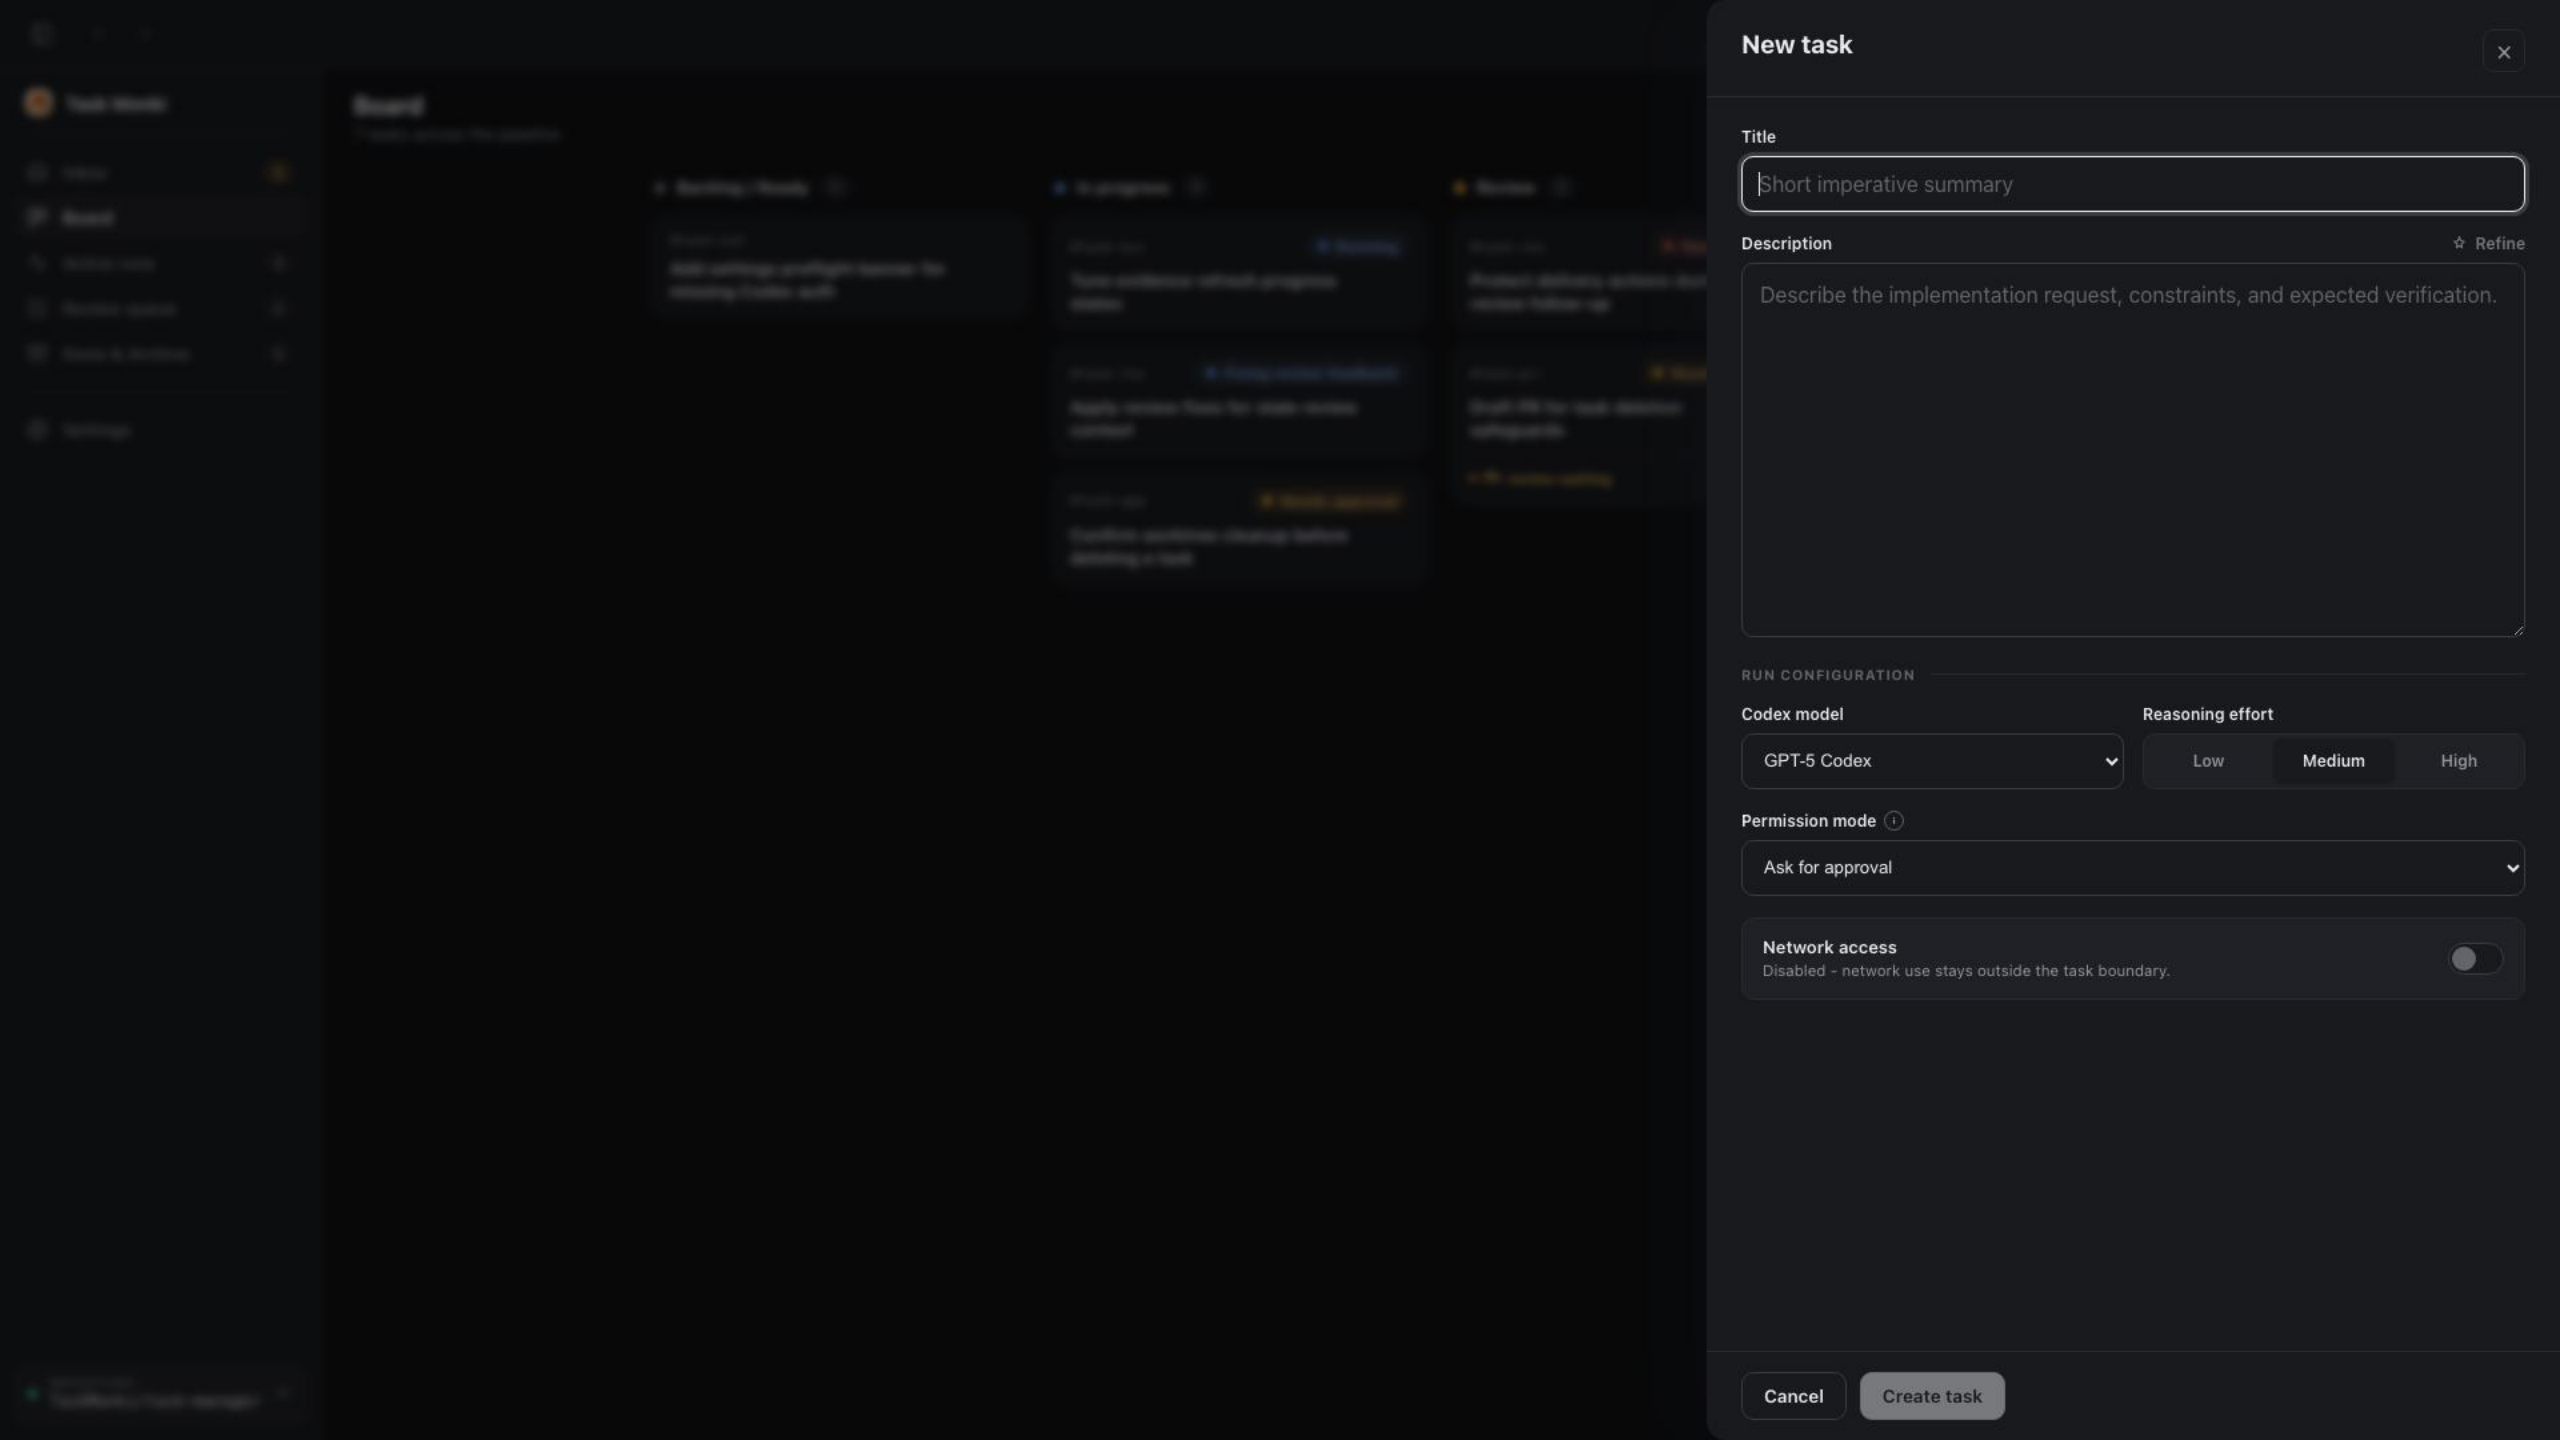

Also remove local worktree

Refresh Git evidence before removing the local worktree.

Protect delivery actions during review follow-up

Description

☆ Refine

When I request changes from Codex review, Task Monki still lets me commit or open a PR while the follow-up is running.

Please fix the workflow state and UI so delivery actions pause until follow-up is done. Add tests for the stale review case.

Refined description

Implement review follow-up delivery guards in Task Monki.

Context:

- A Codex review is a detached quality gate inside the Review phase.
- Requesting review changes starts implementation work and moves the task to In Progress.
- The prior review becomes stale and must remain visible only as context.

Requirements:

1. When a review-derived follow-up run is active, pause Accept, Commit, and Create draft PR everywhere they appear.
2. Do not allow stale review findings to be treated as current actionable

Plan history

Revision 1 of 1

Review follow-up in progress

- Apply delivery-action pause reason across the remaining surfaces
- Keep stale review findings visible as read-only context
- Re-run typecheck, tests, build, and diff check
